

BIO-PANTENOL Dexpanthenol 5%

Cream

Moisturizing and Skin Repair Cream

1 g of cream contains: Dexpanthenol 0.05 g.

How it works?

Dexpanthenol, the active principle of the cream BIO-PANTENOL, is transformed in the body into pantothenic acid. The active form of pantothenic acid in tissues is the coenzyme A. Coenzyme A is essential for the metabolism of carbohydrates, fats and proteins, and detoxification of some metabolic products. At the level of healthy skin, these processes result in the preservation of the proper function. It establishes natural moisture, softness and elasticity of the skin.

BIO-PANTENOL cream is recommended for:

- Skin care after scratches, friction or pressure on the skin;
- Skin care after sun exposure;
- Skin care for itching, redness, burning and allergic reactions;
- Care breast nipples;
- Care of dry and chapped lips and dry and rough hands skin;
- Skin care after shaving and waxing;
- Care skin damage caused by disorders of peripheral blood circulation.

Ingredients: Aqua, Petrolatum, Isopropyl Myristate, Glyceryl Stearate SE, Panthenol, Cetearyl Alcohol, Glycerin, Methylparaben, Propylparaben.

How to use?

BIO-PANTENOL cream applied to skin 2-3 times a day in a thin layer and gently rub. Breast-feeders are recommended to apply the cream on nipples after every nursing. For facial skin care BIO-PANTENOL cream should be applied every night to previously cleaned skin.

Warning:

For external use only.

Storage:

Store below 25°C, in the original package. Keep out of reach of children.

Shelf life after the first opening:

Stated on the package.

Packaging:

30g
